

Education web application

<http://localhost/education/index.php>

what it can do:

1. Display exams by their dates.
2. Make your own tracks and add courses to each track.
3. Search Bar for users to search for courses.
4. High performance because it doesn't have many pages and you can make many tracks with different courses all these in one page only.
5. Any user can register for any course.
6. You will know if student register for course and you can contact them later.

it has simple and beautiful dashboard to control your website easily.

1. Add exams and remove it.
2. Add tracks and remove it.
3. Add courses and remove it.
4. Add photo and content for each course and also information about the instructor.
5. Display all students in table with their registered courses. you can also search in table for special result.

To open the dashboard , you must have its unique path

<http://localhost/education/view/4MDh5pF8RtqXKnRW/login.php>

then login by Email: shehab@education.edu

Password: shehab
